Item

Technical Specification

Number of Switches	4 switches (standard), can be customized
Working Voltage	AC220V or AC380V
Current	9~95A
Load	2KW per circuit
Operating Temperature	40C ~85'C, indoor environment
Control Mode	Support local control and remote control
Box Material	Iron sheet
Control Circuits	500*600*200mm (4 circuits.) 600*800*200mm (8 circuits) 1500*700*370mm (16 circuits)
Communication Method	Standard 4G, optional Wifi
Data Transmission Interval	Once every two minutes (default)
Under-voltage and Over-voltage Protection	270V±5%, 170V±5% (optional)
Under-voltage and Over-voltage Protection	≤100ms
Action Time	
Real-time Monitoring of Voltage	≤100ms
Short-circuit Protection	≤6000A
Abnormal Alarm	When the device is offline, the system will automatically remind you, and an audible and visual alarm is optional.
Fault Self-test	Using closed-loop control circuit, each circuit can self-test
